J.A.R.V.I.S. AI MOCK INTERVIEW SCORECARD

Target Role: **Full Stack Developer** | Date: 2026-07-23 13:21

Overall Performance Score: 55/100

Question 1: Can you explain the difference between client-side rendering (CSR) and server-side rendering (SSR), and when would you choose one over the other?

Candidate Answer: I use React with Redux for frontend state management and FastAPI with PostgreSQL for backend services. I handle CORS, JWT auth, and optimize queries with database indexes.
Scores: Accuracy: 55% | Confidence: 50%
Feedback: Solid answer! Add numerical metrics (e.g. 'reduced latency by 40%') to reach 95%+ score.
