J.A.R.V.I.S. AI RESUME & CAREER ANALYSIS REPORT

ATS Score: 57/100 | Date: 2026-07-23 13:24

Executive Verdict

Evaluated resume specifically against target role 'Data Scientist'. Achieved an ATS score of 57/100 with 0 key skills matched and 9 critical keywords missing for this role.

Key Strengths & Highlights

- Structured Project / Work Experience section detailing implementations.

Weaknesses & Red Flags to Fix

- Missing high-priority keywords specifically required for 'Data Scientist': Data Visualization, Tableau, Etl, Power Bi.
- Lacks quantifiable ROI metrics (e.g. 'improved latency by 35%', 'handled 500+ daily active users', 'reduced error rate by 40%').
- Missing essential ATS section headers: Certifications / Contact.
- Bullet points need stronger action verbs tailored for 'Data Scientist' (e.g. 'Architected', 'Deployed', 'Engineered', 'Optimized').

Missing High-Demand Keywords

- Data Visualization
- Tableau
- Etl
- Power Bi
- Pandas
- Sql

Actionable Step-by-Step Improvement Roadmap

- Step 1: Add a dedicated 'Technical Skills' section containing missing keywords for Data Scientist: Data Visualization, Tableau, Etl, Power Bi.
- Step 2: Add exact numerical metrics to your project bullets (e.g. 'Optimized model accuracy to 94%', 'Accelerated search runtime by 40%').
- Step 3: Rewrite your project bullet points using strong action verbs relevant to Data Scientist ('Architected', 'Deployed', 'Engineered').
- Step 4: Create standard section headers for ATS screeners: Certifications / Contact.
- Step 5: Format in standard 1-page layout using clean single-column structure and standard fonts (Calibri/Arial 10-11pt).
